

PRODUCT BRIEF · HEALTHCARE READINESS · 2026

Human-State Intelligence for Healthcare.

Consent-based insight into the human state behind clinical performance.

Today's systems measure workflow, productivity, assets, and risk with precision. The decisive factor they still can't see is the **cognitive, emotional, and recovery state** of the clinician carrying the decision, the workload, and the mission.

THE STAKES / WHY THIS MATTERS NOW

Most diagnostic errors are decision errors — made by a clinician under load.

THE PATIENT-SAFETY CRISIS / DEATHS · PAYOUTS · LITIGATION

250,000

deaths a year linked to medical error — ranked the 3rd-leading cause of death in the U.S.

a 2023 analysis estimates ~795,000 deaths or permanent disabilities from diagnostic error alone; estimates vary and the ranking is debated

Makary & Daniel, BMJ 2016; Newman-Toker et al., BMJ Q&S 2023.

BMJ · Johns Hopkins

\$4.8B

paid out in U.S. medical-malpractice claims in a single year

roughly \$40–60B per decade — only a fraction of actual harm is ever compensated

National Practitioner Data Bank, 2023.

NPDB

11,000+

malpractice claims paid every year, averaging ~\$450K each

the majority of surgeons face a malpractice claim during their career

National Practitioner Data Bank.

NPDB

THE HUMAN STATE BEHIND THE ERROR / WHAT CIQ ADDRESSES

2×

higher risk of a patient-safety incident when a clinician is burned out

meta-analysis of 47 studies, 42,000+ physicians

Panagioti et al.

JAMA Internal Medicine

42%

of U.S. physicians report a burnout symptom (2025)

down from a 63% peak in 2021 — still above other U.S. workers

AMA national burnout study (Mayo · Stanford · CU).

AMA

49.8%

burnout in emergency medicine — the highest-strain specialty

front-line, high-acuity settings are hit hardest (2025)

AMA Organizational Biopsy, 2025.

AMA

HOW IT WORKS · PHYSICIAN READINESS · 2026

From Late Recognition to Readiness.

Recovery, recalibration, and reversible support — before performance breaks down.

PHYSICIAN READINESS / THE CIQ FLOW

WHAT CIQ MEASURES / THE HUMAN-STATE LAYER

Per-question context on how load, stress, attention, and recovery shift during the assessment.

ORGANISATIONAL READINESS / WITHOUT EXPOSING INDIVIDUALS

BAT — Burnout Assessment Tool · **HRV** — heart-rate variability. The biometric layer is ancillary and consent-based; it adds context, not diagnosis.

TRUST · EVIDENCE · GOVERNANCE · 2026

Evidence Behind Every Recommendation.

The ShelterZoom / Mithra trust layer — provable AI, not unsupported output.

THE TRUST LAYER / SHELTERZOOM · MITHRA

CIQ sends trusted documents, research, and approved policies into Mithra as a **Single Source of Truth**. Mithra returns grounded, cited answers — so every recommendation can show where the reasoning came from, what evidence supported it, and whether the output is **fully, partially, or untrusted**.

TRUST CAPABILITIES / OUT OF THE BOX

AI Data Lineage

Trace where every answer came from

Tamper-Proof Evidence

Cryptographic hashing, immutable integrity

Guardrails & Citations

Answers grounded in approved sources

Document GPS

Tokenised sharing, access control, revocation

CyberVault & Spare Tire

Secure backup and resilience layers

Governance Credibility

Auditability and compliance readiness

SIMULATION INSIGHT / HUMAN-STATE DURING DRILLS

During high-fidelity medical simulations and crisis drills, CIQ adds an ancillary human-state layer: a play-by-play, decision-by-decision branch view of how **cognitive load, hesitation, recovery, and challenge-skill balance** changed through the exercise. It does not replace the simulation.

PRODUCT POSTURE / WELLNESS, NOT DIAGNOSIS

WHAT CIQ IS

- ✓ A general wellness & performance-reflection tool
- ✓ Cognitive feedback, stress-awareness cues, behavioural insight
- ✓ Evidence-informed recommendations

WHAT CIQ IS NOT

- ✗ Not a medical or mental-health diagnosis or treatment
- ✗ Does not prescribe, or replace professional care
- ✗ Not a competency judgement or surveillance

Understand the human readiness behind every decision.
